Trim

Bleed

with Round Corner Options

The diagram shows a square plate with a central red dot representing a drill hole. Three concentric lines are drawn around the plate: an innermost green line with rounded corners, a middle red line, and an outermost blue line. The text explains the purpose of each line: the green line is the safety margin, the red line is the trim size, and the blue line is the bleed area for graphics.

Safety: No TEXT beyond this line.

Trim: Final trim size ordered.

Bleed: To ensure ink coverage goes to the very edge of the product, make certain to extend any graphics/artwork past the **Trim** to the **Bleed** line.
